Top stories of the week

> ABS today has issued a new advisory aimed at helping the industry prepare for the upcoming IMO 2020 global sulfur cap. "The IMO 2020 sulfur cap requirement will introduce a significant demand change from heavy fuel to low sulfur fuel almost overnight. The industry currently is debating how to prepare as the consequences of this shift are difficult to predict," "The ABS Advisory addresses concerns about the safety impacts and quality of the new blended and hybrid fuels that are currently not covered by the ISO fuel standard, and provides guidance on fuel selection, modification considerations and operational challenges." The global 0.50% sulfur cap on marine fuel comes into force from January 1, 2020. ABS' Advisory on Marine Fuel Oil is available to read : Cheap Fuel Oil in 2020 Will Not Guarantee Cheap HSFO Bunkers "Understanding where to lift bunkers and what to pay for them is going to get increasingly difficult," 20/20 Marine Energy's Adrian Tolson tells Ship & Bunker. Read in Full Singapore: April Bunker Sales Hold Steady But dip in sales of 380 CST over last year. Read in Full LNG's Rise to be Dominant Bunker Fuel is Inevitable: GasLog ABS says LNG bunkers "will probably be the most sustainable option going forward. (Ship & Bunker, June 8, 2018)

OVERVIEW

This report contains the parameters of fuel prices, and is intended to provide information regarding the three primary used fuels in marine fuel bunkering tasks. The prices presented in this weekly report reflects the most strategic areas and hot spots that acts as a guiding line for the fuel prices all over the world.
