Top stories of the week

- Total monthly bunker sales at Singapore rose in September compared to the same month a year ago. September sales volume at the Southeast Asian shipping and oil trading hub was 4,341,000 metric tonnes (mt) compared to 3,831,000 mt over the period, according to port authority figures. Sales of the key bunker fuel grade 380 centistokes (CST) were up by under a little under half a million mt while marine gasoil sales were down, from 68,600 mt in 2016 to 55,500 mt in September 2017. August monthly sales of bunker fuel, however, were slightly higher than September's. Singapore is the biggest bunkering port with annual sales of well over 40 million mt. Last year, the port edged closer to 50 million mt when annual sales reached 48.6 million mt. (Ship & Bunker, 13 October, 2017)
- The number of accredited bunker suppliers in Singapore this month has fallen to 55, from 56 last month, according to the latest information from the Maritime and Port Authority of Singapore (MPA). The drop follows the exit of Uni Petroleum Pte Ltd who decided not to renew its bunker supplier licence at the end of September, the company confirmed to Ship & Bunker. For 2016 the MDO, MGO and MFO supplier was ranked 45th on MPA's list of bunker suppliers by volume. Uni Petroleum is not the only supplier to have left the Singapore market this year. At the end of August, Panoil Petroleum Pte Ltd. (Panoil Petroleum) along with top three ranked Singapore bunker supplier Universal Energy Pte Ltd (Universal Energy) also fell from the list after MPA took action following a number of indiscretions by the former suppliers. (Ship & Bunker, 10 October, 2017).

OVERVIEW

This report contains the parameters of fuel prices, and is intended to provide information regarding the three primary used fuels in marine fuel bunkering tasks. The prices presented in this weekly report reflects the most strategic areas and hot spots that acts as a guiding line for the fuel prices all over the world.
